

Juliana Insole and Lining Materials

Technical characteristics & usage advice

The Juliana Micro is a stretchy, lightweight orthotic covering that has a great finish. It is cost effective and is ideal for producing large volumes of orthotic top covers/linings. More affordable than our Micro Fibre Silana, but still of excellent quality.

Features:

- Fast and flexible adoption
- High resistance to abrasion
- High quality consistency
- Breathable

Application:

Ideal for producing large volumes of orthotic coverings/linings, also ideal for top covers.
