

# Movado Orthotic Cushioning Foam

## Technical characteristics & usage advice

Aortha Movado is a soft, closed cell, hygienic, cushioning material. With a Shore value of just A15, Movado is the ideal material for devices where compliance is limited and force-based shear forces are present.

Its super-soft characteristics make it the ideal material for use as a lining or as a lightweight cushioning component for simple insoles and more advanced orthotic therapy devices.

### Features:

- Good impact absorption capability.
- Excellent shear resistance.
- Soft against the skin.
- Contouring.
- Breathable.
- Good chemical resistance.

### Application:

Insoles and orthotic linings for sensitive feet. Orthotic, braces and prosthetic appliances.
