

OrthaGrip Rubber Solution

Technical characteristics & usage advice

Aortha OrthaGrip Rubber solution, a versatile rubber solution adhesive ideal for working with rubber, leather and textiles.

OrthaGrip is a natural rubber cement generally used for repairing and manufacturing shoes, leather goods, orthotics and prosthetic appliances.

Features:

- Apply on one surface for temporary bonding and both sides for permanent bond.
- Produces a more flexible bond than neoprene adhesives.
- Very high initial strength and excellent heat resistance

Application:

Apply to both surfaces and allow to tack - 15 minutes as a general rule.

Use for:

Natural rubber, textiles, cork, foams and leathers.
