

# Copolymer Polypropylene Plastic Sheets

## Technical characteristics & usage advice

Aortha PPC Copolymer Polypropylene has excellent physical characteristics, particularly for applications where impact strength and heat resistance is important. The ability of Polypropylene to yield pressure and torque, yet consistently return to its form without fatiguing, will eliminate distortion.

### Features:

- Impact Resistance
- Flexibility
- Chemical Resistance
- Lightweight
- Easy Processing

### Application:

Ideal for foot orthoses, knee braces, and spinal supports due to their flexibility and strength. Perfect for prosthetic sockets and other durable prosthetic parts, offering impact resistance and comfort.

### Environmental Considerations:

These sheets are recyclable, contributing to sustainable manufacturing practices by reducing environmental impact and supporting sustainability initiatives. It has a lower environmental impact to other plastics, making it a more eco-friendly choice.

### Available Colours:

Black and white.
